**Subject:** FW: ATSDR data/information request

Latest information from our end in Region 8, regarding data request.

Kristen and Steve are R8 toxicologists who are in the EUL in the Area Command in Durango.

Chris,

I apologize for the delay, it's amazing how time flies over here.

I will see what we can do about the data component. The EULs (Steve and Kristen) would be able to address the sampling plans and DQOs.

And John McKeown is a friend and a co-worker. He's such a great guy and a great OSC, we were lucky to have him transfer over to R1.

Hi Dan,

I see that you are from R1 EPA. Worked a lot with John McKeown when he was out in R8 years ago.

Let me know if it will be difficult to obtain the following data sets from EPA. In order of priority would be the sediment and surface water historical data and sampling plans and DQOs. Well data can come later as it is ongoing.

ATSDR is requesting the following data from EPA via the Area command in Durango CO when it becomes available. We are requesting this data in response to a request from EPA 8 from Aug 14 2015. I was in Durango from Aug 11 to Aug 15. I am ccing the EPA 8 folks involved in the EU.

-Animas River

**-historic**, pre-event surface water sampling data for the Animas. We understand this is being compiled into a searchable format and this would be very useful for ATSDR's review

**-historic** , pre-event, sediment sampling data for the Animas.

ATSDR would also like to obtain

-Private Well data for the wells being tested by EPA in the Animas river basin

**-Sampling plans, sample location descriptions, and DQOs for surface water, sediment, and well data.**

If you have questions, you can reach me at this email address or at 303 717 3089 (cell) or 303 312-7013 (office). If I need to check with another source for this request, please let me know.

Thanks,

Chris
